Rail Program

Town/County Division	Project Description	Estimated Cost
Divisions 8, 10 Mecklenburg, Cabarrus, Stanly, Montgomery, Moore Counties 80000.1.4.91	The Rail Division requests board approval of a Freight Rail & Rail Crossing Safety Improvement (FRRCSI) funding reallocation associated with construction of improvements on the Aberdeen Carolina & Western Railway (ACWR) corridor. A modified project scope removes a rail size improvement component along the corridor; all other scope provisions remain. ACWR will be responsible for construction of the project. The scope reduction will result in a cost savings to the project of \$250,000 that will be reallocated to 80000.1.4.92. The cost of this project is \$8,581,542 and the total estimated cost to the Department is \$4,290,771. FRRCSI ID: F20301	\$4,290,771
Division 10 Stanly County 80000.1.4.92	The Rail Division requests board approval of a Freight Rail & Rail Crossing Safety Improvement (FRRCSI) funding reallocation to assist in the construction of improvements to the Aberdeen Carolina and Western (ACWR) railway corridor. Due to an escalation of steel costs, the project requires supplemental funding. A funding supplement, that is reallocated from 80000.1.4.91 in the amount of \$250,000, will result in a total estimated cost to the Department of \$860,000. The total project cost is \$1,703,301. FRRCSI ID: F20114	\$860,000

Cash – Highway Fund v Trust Fund

Change in Balances

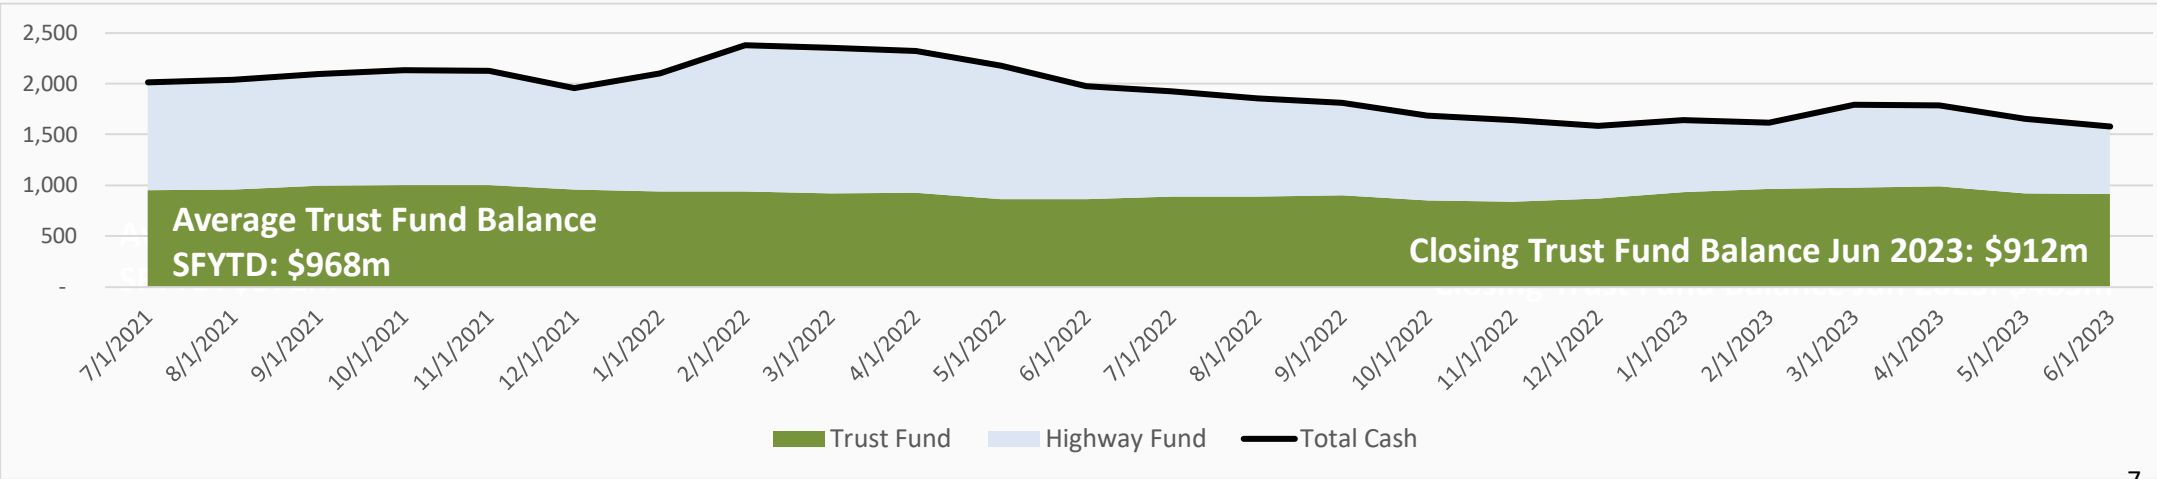

Balances Through SFY23

- Balances moved from 46% in January to 38% in February for the HF and 49% to 4% in the TF.
- The SFY 2022 Build NC proceeds plays a large part in the increased TF.
- The application of economic factors in the Adjustments model reduces the Build NC projected payouts.
- Additional causes to the difference is due to a further refinement of project forecasting using SAS for Build NC and USDOT Discretionary Grant projects.

Projected Closing Cash Balances (\$m): SFY22–SFY23

Variance to Spend Plan - Month of Feb

February Variance: \$55.6m, 8.8% of Spend Plan

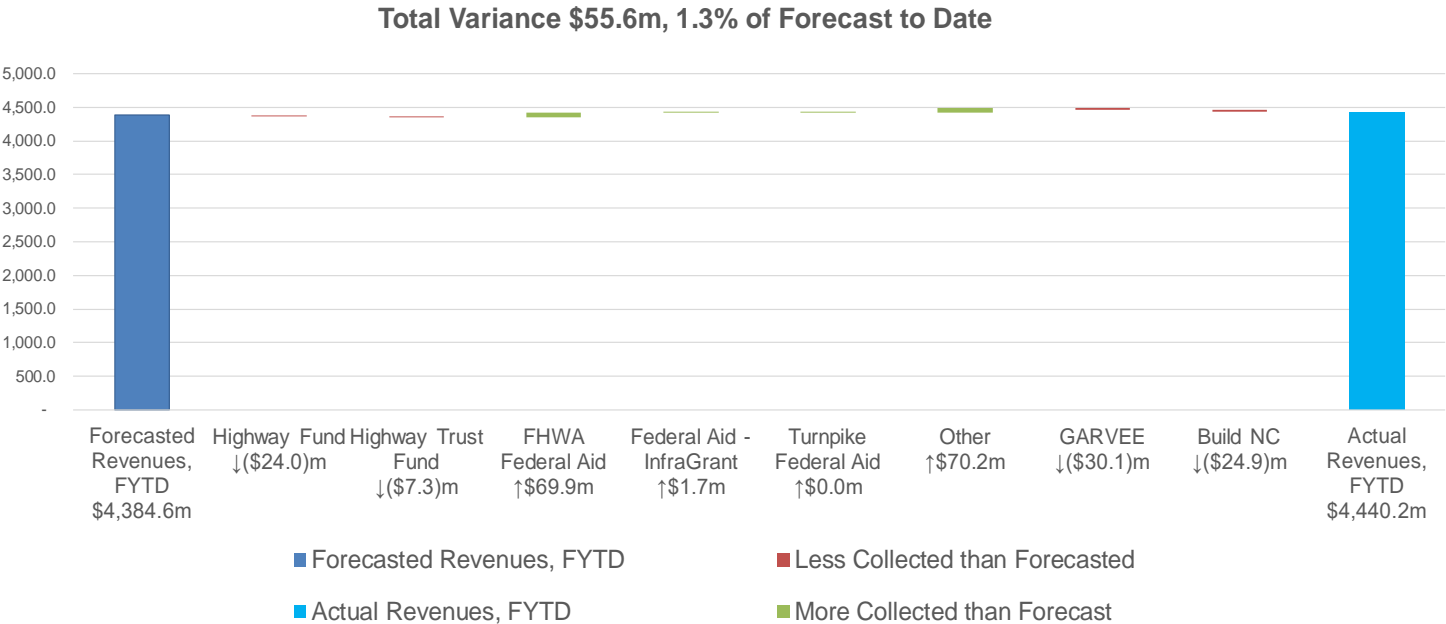

Commentary

- FHWA Federal Aid Revenue includes GARVEE debt service reimbursement of \$132.4 million. The transfer and payment was forecast for March, but the transaction occurred in late February, creating a variance due to timing.
- Non-GARVEE revenues from FHWA were \$96.6 million, which remains lower than expected.
- Other Revenue variance is largely due to receipt of State Capital and Infrastructure Funds (SCIF). Aviation’s spend plan projected receipts of \$38.4M in February, actual receipts were \$115.1M.

Maintenance is 26.4% of February Spend Plan

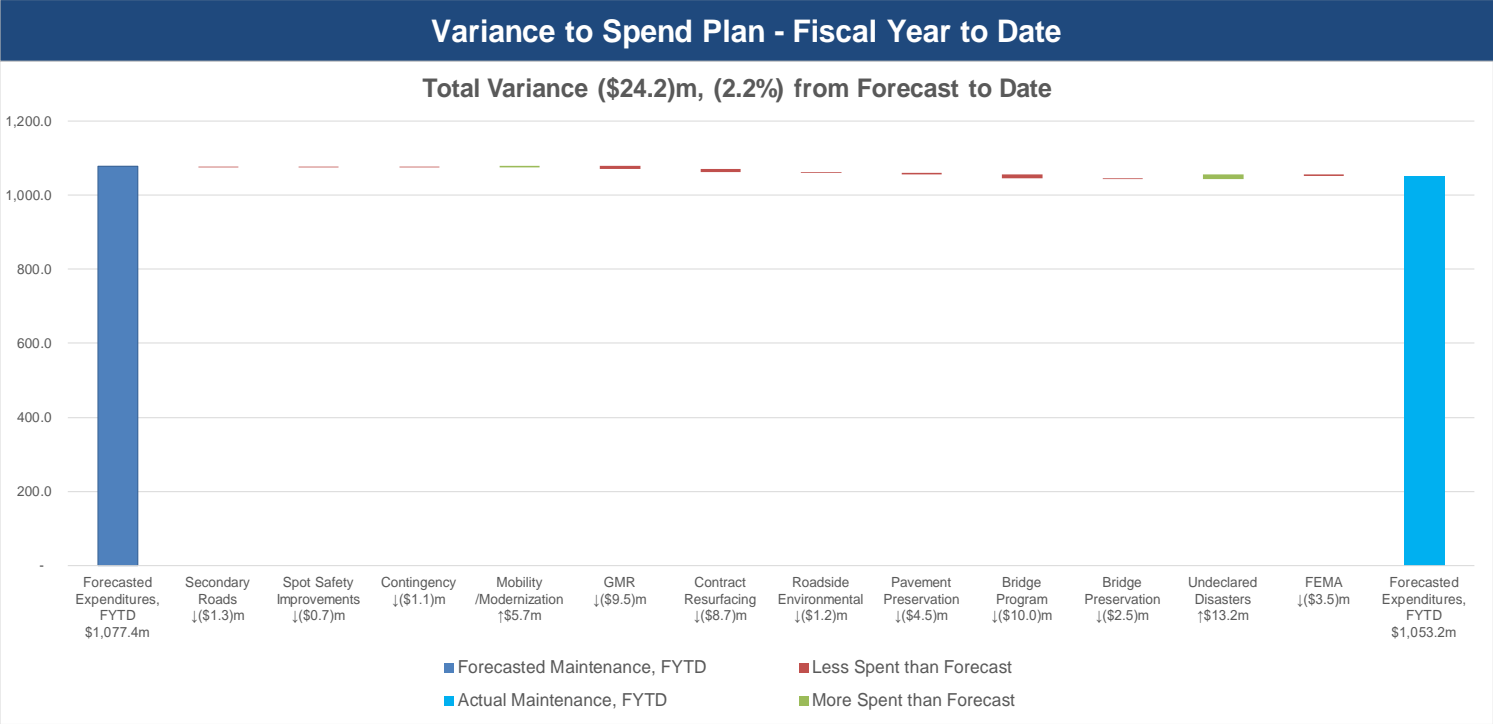

Commentary

- The February monthly variance is primarily driven by underspending in GMR, Bridge Program, and Contract resurfacing, partially offset by higher levels of spending for undeclared disasters.
- The Chief’s Office is working with the Divisions to improve the monthly spend plan breakdown based on Division projections/program expenditures.

PRODUCT INNOVATION – H-Pile Points (10” and 12”)

Stack of H-Piles with CSC pile tips welded on their ends – image from CSC website

H-Pile Points are manufactured by the Eagle Foundry in Eagle Creek, Oregon and are distributed through Construction Supply Company (CSC) out of Tualatin, Oregon. They are currently approved and listed on the Approved Products List (APL) as NP21-9031 (12” version), and NP21-9034 (10” version). The H-pile points are used to strengthen pile ends by absorbing impact and distributing load uniformly thereby reducing risk of pile failure. They also save time/money by driving piles more efficiently and they protect the piles from damage due to underground obstructions. For more information, please visit:

PRODUCT HIGHLIGHT – E-TUFF® 7097

Workers applying and spreading E-TUFF® 7097 on a bridge deck – image from PSI

E-TUFF® 7097 is manufactured by Poly-Tuff Systems International (PSI) Highway Division out of Las Vegas, Nevada. It is currently approved for use as an epoxy overlay to maintain bridge decks and is listed on the APL as NP21-9029. E-Tuff® 7097 is a two component, 1:1 ratio, 100% solids, low modulus, low viscosity, moisture tolerant, rapid setting, adhesive and epoxy binder. It is used primarily for bonding skid resistant materials to hardened concrete and as a binder in epoxy mortars. It has a gel time of 20 minutes and a cure time of 2-6 hours depending upon ambient temperatures. For more information, please visit:
