Alpesh Patel

Cambridge Systematics, Inc

#### **Outline**

- NC Toll Policy
- NC Toll Policy Handbook
  - Objectives
  - Content / Process
  - Amendment / Implementation
- Next Steps
  - Training, NCDOT Resources

# **Policy Development**& Implementation Timeline

Summer 2019 & Spring Spring Spring 2018 2019 Beyond 2017 **Implementation Policy Development Handbook Development Final Handbook Initiated by NC BOT adopts Pre-Submittal NC Toll Policy** Secretary **Assessment (PSA) PSA Training Trogdon Process** Handbook **NC Legislative** development Performance and Charge operationalizes **Financial Policy Feasibility Tools** • **Engage** and Tests **Stakeholders Engage** (Workgroup #1) **Stakeholders** (Workgroup #2)

## **Policy Development**

#### NC Toll Project Development Policy or NC Toll Policy

Adopted by the Board of Transportation (2018)

#### Framework:

- Defines eligible project types
- Directs close coordination with M/RPOs
- Directs development of a defined tolled and express lanes feasibility process

#### Framework does not:

- Require or mandate increased tolling
- Allow NCDOT to identify specific projects to evaluate

## **Eligible Project Types**

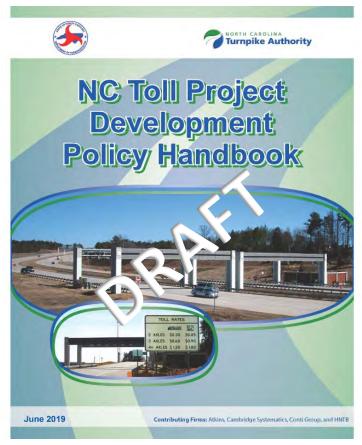

- Greenfield expressways or freeways
- Express lanes (or priced managed lanes)
- Upgrades of existing partial-control roadways to full access control facilities
- New bridges or major bridge replacements

# **Policy Implementation**

Development of a **Handbook** operationalizes the NC Toll Policy, including:

- Assessment structure, steps, and timetables
- Financial feasibility and performance reporting
- Communication and documentation of results

# Handbook Development Management

#### **Internal NCDOT team (PMT)**

 Turnpike Authority, Transportation Planning Division, Division of Highways

#### Work Group (advisory)

 MPOs/RPOs, League of Municipalities, Metro Mayors, Association of County Commissioners, FHWA, Agency staff

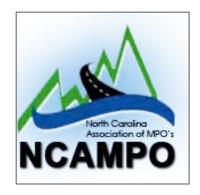

#### Multi-disciplinary consultant team

# Handbook Development Objectives

- Create a defined process to support local decision making for toll candidate considerations in advance of submission to NCDOT Strategic Prioritization and consistent with State Transportation Improvement Program requirements.
- Increase accountability through more openness and transparency, particularly as NCDOT faces funding challenges posed by diminishing reliability of traditional funding sources for NC Highway Trust Fund.
- Engage partners, develop protocols/procedures to guide early identification and tolling potential.

# Handbook Development Project Sponsor Feedback

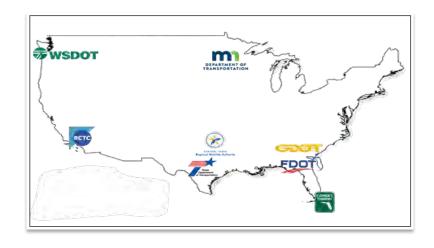

- Focus on standards, benchmarks, planning practice
- Uniform method, approach for assessment
- Develop and test tools; provide access
- Provide adequate time for assessment
- Ensure implementation is rolled out well...education, expectations are important!

### Handbook Development Content

**Peer Review –** DOTs, Toll Authorities interviews

Prototype Analysis –
evaluation standards and
criteria testing

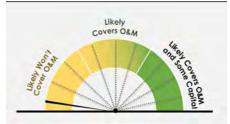

### Handbook Development Content

### **Pre-Submittal Assessment (PSA)**

- Performance Criteria linked to Strategic
   Prioritization
- Financial Feasibility can the candidate project cover Operating and Maintenance costs

**Implementation** – dedicated internal resources, liaison to project sponsors

# Handbook Development Pre-Submittal Assessment (PSA)

#### Early evaluation of performance and financial project viability

- Pre-screening steps coordinated with project sponsors
- Incorporate into Comprehensive and Metropolitan Transportation
   Plan development
- Structured process and schedule
- Evaluation tools accessible via NCDOT
- More information for local policy boards

### Performance and Data Driven Approach

# Performance Based Criteria tied to Strategic Prioritization

Example: Congestion Relief

#### **Volume-to-Capacity Ratio**

- Calculated from Statewide Model or Congestion Management Team
- Compare V/C ratio with and without project

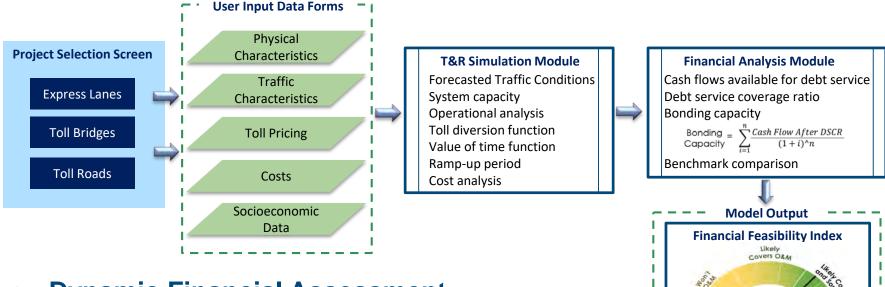

#### **Travel Time Savings**

- Calculated from Statewide Model or Congestion Management Team
- Requires value-of-time assumption

#### **Transit Utilization**

- Requested from Regional Transit Authorities
- Quantify expected number reduced single-occupancy vehicle trips

# **Preliminary Financial Feasibility Module**

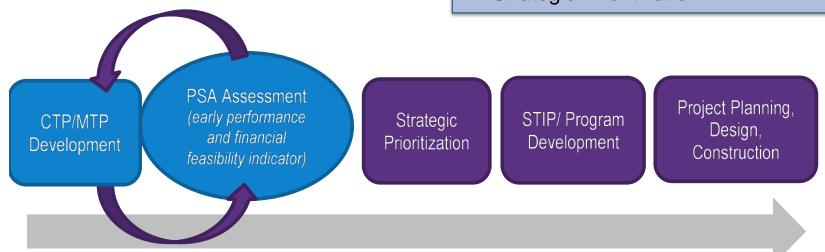

- Dynamic Financial Assessment
  - Likely covers O&M and portion of Capital (i.e., presents positive financial flexibility)
  - Likely covers O&M only (i.e., potential financial flexibility)
  - Likely won't cover O&M

     (i.e., additional funding sources would likely be needed)

# **Long Range Planning Integration**

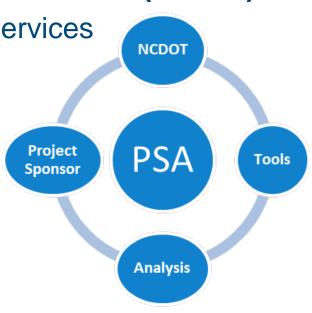

- Additional step in Comprehensive and Metropolitan Transportation Plan Development
- Include in early scoping and Plan "Set Up" meetings

- Scoping checklist
- Sets expectations with local communities
- Supports "fiscal realism" for RPO area plans
- Occurs prior to project submission for Strategic Prioritization

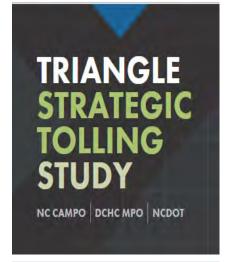

#### Implementation Framework

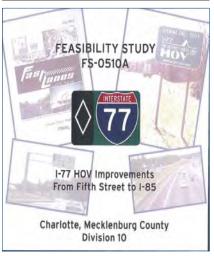

- Intra-Departmental Project Evaluation Team (IDPET)
  - TPD, NCTA, SPOT, STIP, Technical Services
    - Oversee PSA schedule, steps and tools
    - Technical expertise; liaison to project sponsors
    - Division Engineers local support role
- PSA Training Program
  - September 2019
- Biennial updates tied to Strategic Prioritization cycles and industry changes

#### Implementation Considerations

- Region and Corridor Based Planning
  - Impacts of various alternatives
  - Network Analysis
- Data/Studies
  - Leverage field-collected and/or early project screening data to support PSA inputs
- Inform project submittals for future Strategic Prioritization
  - Refines project cost estimates

#### **NC Tolls Policy Amendment**

#### "Grandfather" Policy:

"Any toll candidate project(s) not committed\* in P6.0 will be subject to the Handbook guidelines. An MPO or RPO request to convert a current non-tolled project in NCDOT's strategic prioritization database to a tolled project would be considered a new project and subject to the Handbook guidelines.

\*Note: "committed" refers to the definition used for programming a project for right-of-way or construction in the STIP under NCDOT's latest strategic prioritization process.

- ✓ Accommodates P6.0 Schedule
- ✓ Recognizes projects in planning vs project development phase
- ✓ Supports project assessment for future Prioritization cycles

**Approved by NCDOT BOT (June 27, 2019)** 

#### **PSA Training**

#### **Purpose**

- Review additional PSA steps/details
- Interact with the Financial Feasibility Tool
- Understand the role/resources of IDPET

#### **Expectations**

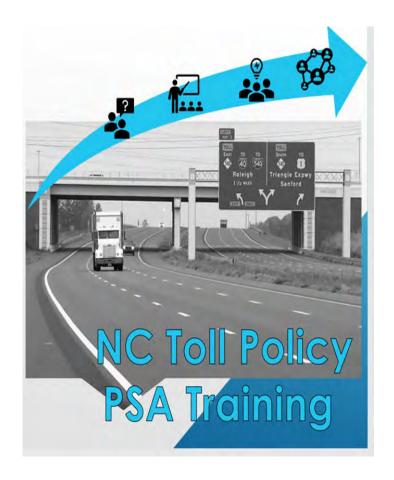

- Bring your laptop
- Bring toll project/candidate examples to "test" through the Tool
