APPENDIX – Catalog of Remnant Properties	16

EXECUTIVE SUMMARY

Session Law 2015-241, Section 29.9.(a) states:

Plan - The Department of Administration, in collaboration with the Department of Transportation, shall develop a plan to reduce the amount of remnant property resulting from the acquisition of rights-of-way. The plan shall include a method or methods for disseminating information to contiguous or adjoining landowners and other members of the general public about (i) remnant property eligible for sale or other disposition and (ii) the process for placing a bid or offer on the remnant property, including posting the information required under this subdivision on the Web sites for both Departments.

In addition, Section 29.9.(b) states:

Report. – The Departments shall jointly report to the Joint Legislative Transportation Oversight Committee by February 1, 2016, on the development of the plan required under this section. The report shall include all of the following:

- (1) An identification of all remnant property eligible for sale or other disposition.
- (2) An identification of the amount and types of costs incurred by the State from retaining remnant property.
- (3) An identification of the estimated fair market value, as determined by the Department of Administration, for each remnant property eligible for sale or other disposition.
- (4) An identification of any legal issues that may prohibit, or arise from, the sale or other disposition of other remnant property, if any.
- (5) An identification of a method for reducing the average annual amount of funds expended by the Department of Transportation for the acquisition of rights-of-way by three percent (3%).
- (6) Any other matters or information the Departments jointly deem relevant to the development of the plan.

As described in more detail herein, the following actions have been taken by the Departments of Administration and Transportation to develop a plan to reduce the Department of Transportation's inventory of remnant property:

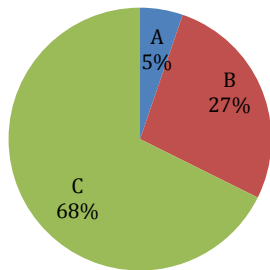

1. Developed a catalog of all parcels available by extensive research of Department of Transportation records, county tax records and NCOneMap Statewide Parcel Data
2. Assigned a preliminary categorization of properties based on anticipated use and value in accordance with the following definitions:
 - a. Class A – parcels with sufficient size and access to allow commercial or residential development
 - b. Class B – parcels that will enhance the value of adjacent land by allowing more extensive use when joined with the adjacent land
 - c. Class C – parcels that do not meet the definition of Class A or B and due to size or lack access and will only be of interest to an adjacent landowner
3. Assigned an estimated fair market value

At this time, as shown in Table 1, there are approximately 3,300 remnant properties with a total estimated fair market value of \$12 million available for disposal.

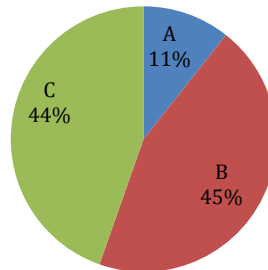

Table 1: Remnant Property Breakdown by Class, Acreage and Estimated Fair Market Value

Preliminary Parcel Classification	Number of Parcels	Acres	Estimated Fair Market Value
A	175	540	\$5,682,784
B	899	2,265	\$4,727,653
C	2,245	2,259	\$1,718,992
TOTAL	3,319	5,064	\$12,129,429

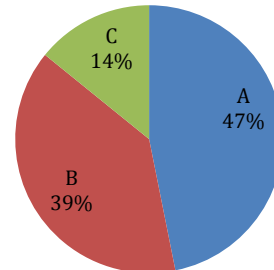

Number of Parcels

Acres

Value

In addition, Section 29.9.(c) states:

Implementation. – The Department of Administration shall implement the plan required under this section by July 1, 2016

The existing North Carolina Administrative Code, NCAC 2B.0143, has well defined requirements and procedures that allow disposition to proceed. While it is desirable to amend some of these rules (e.g. allowing upset bids and allowing the increased ability to negotiate directly with adjoining property owners), the Department of Transportation will move forward and actively market the Class A parcels as first priority for disposal. To assist in this effort the Department of Transportation will enlist the assistance of qualified contractors geographically distributed across the state.

In addition, in accordance with the session law, both Departments are currently well staged to post the information required under this subdivision on their web sites so that interested parties are aware of remnant property available and how to pursue acquiring it.

The implementation of this plan will occur no later than July 1, 2016.

REMNANT PROPERTY

Definition

Remnant property, also known as “residue”, is a term used to describe property that was acquired in addition to the right of way necessary for a transportation project because it was determined that the property would be unusable by the owner after completion of the transportation project. By definition, remnant property exists outside the right of way needed to accommodate the transportation project. This report is focused on decreasing the Department of Transportation’s inventory of remnant property.

This report does not detail protocol related to disposing of “surplus” right of way. Surplus right of way is property that was anticipated to be needed to accommodate the highway footprint or for permanent easements (such as easements needed to accommodate utility installations or drainage structures), however after project completion it is determined that acquisition was unnecessary. Surplus property is disposed of through a different process which is not a part of this report.

Identification

In accordance with the session law, a catalog of remnant properties resulting from the acquisition of rights of way has been compiled. The Department of Transportation used multiple approaches to develop a complete list of remnant properties. First, the enterprise data warehouse system (SAP) was mined to identify property acquired after 2003; unfortunately, SAP does not house legacy data prior to April 2003 and some parcels date back to the 1920’s. Second, while data records exist in local Division Right of Way offices, there was often inadequate parcel information to confidently identify parcel locations. Therefore, the identification and cataloging of the majority of properties could only be accomplished through manual efforts such as retrieving information from county tax records and the NCOneMap Statewide Parcel Data which is maintained by the Center for Geographic Information and Analysis. The resulting catalog, shown in the Appendix, consists of approximately 3,300 remnant properties. Pertinent property information for each remnant parcel is included- county, acreage, estimated fair market value and latitude and longitude coordinates.

In addition, each remnant property has been preliminarily categorized as one of the following types:

Class A – A property (i) whose size and road access are sufficient to allow commercial or residential development of one or more stand-alone projects without requiring the acquisition of additional real property and (ii) whose size and shape appear sufficient to allow compliance with applicable or proposed zoning and development standards for parking, setbacks, side and front yard requirements, and access.

Class B – A property (i) that does not meet the definition of a Class A property, but still may have significant value and (ii) that would enhance the value of adjacent land by allowing larger or more extensive uses when joined to the adjacent land.

Class C – A property that does not meet the definition of a Class A or Class B property and due to size or lack of access will be of interest only to an adjoining owner.

Class D – A property that is within the limits of a current or planned future project and which may be needed for the construction of that project and therefore is not yet available for disposal.

Moving forward, when the DOT acquires remnant property it will be cataloged and initially categorized as Class D. Following completion of the transportation construction project the remnant property will be reclassified and made available for disposal. Since Class D properties are not yet available for disposal they are not included in the Appendix list.

Fair Market Value

In general, at the time of disposal each remnant parcel will need to be appraised to determine the approximate current fair market value. However, prior to appraisal and in preparation for deed recordation, a survey will need to be performed to identify property boundaries. Inclusive of the appraisal and survey costs, fair market value determination is estimated to average \$3000 to \$4000 per parcel. Considering the number of remnant properties and the potential lesser value of the Class B and Class C properties, surveying and appraising at this time would be cost prohibitive.

Therefore, for the purposes of this report, the preliminary estimated market values for each of the cataloged remnant properties shown in the Appendix were determined using a combination of county tax office parcel values, where available, and estimated values as assigned by DOT Right of Way staff.

Cost of Retaining Remnant Property

DOT incurs minimal costs to maintain some of the remnant properties that remain in the State's inventory. Since remnant properties are not part of highway rights of way remnant properties are not maintained to the same standard as rights of way and may not require any ongoing maintenance. Typical maintenance activities associated with some remnant properties include occasional mowing and picking up litter or trash. These activities are more likely needed for remnant properties in urban areas. Estimated costs associated with maintenance activities range from less than \$1000 per year to \$3000 per year for each division. Therefore, using an average of \$2000 per Division per year, a conservative estimate of total costs incurred by the DOT is \$28,000 per year.

DISPOSITION OF REMNANT PROPERTY

Posting of Information

Information regarding properties available for public sale or other disposition will be available through web links on DOT's and DOA's public facing web sites. These web links will provide information to interested parties, such as contiguous or adjoining landowners and other members of the general public, about the process of placing a bid or offer on the remnant property.

In addition, as shown in Figure 1, these links will lead to an ARC GIS map of North Carolina showing all remnant properties that are currently available for disposal. Each residue property will be located on the State map and color coded to indicate the preliminary property Class (i.e., A, B or C).

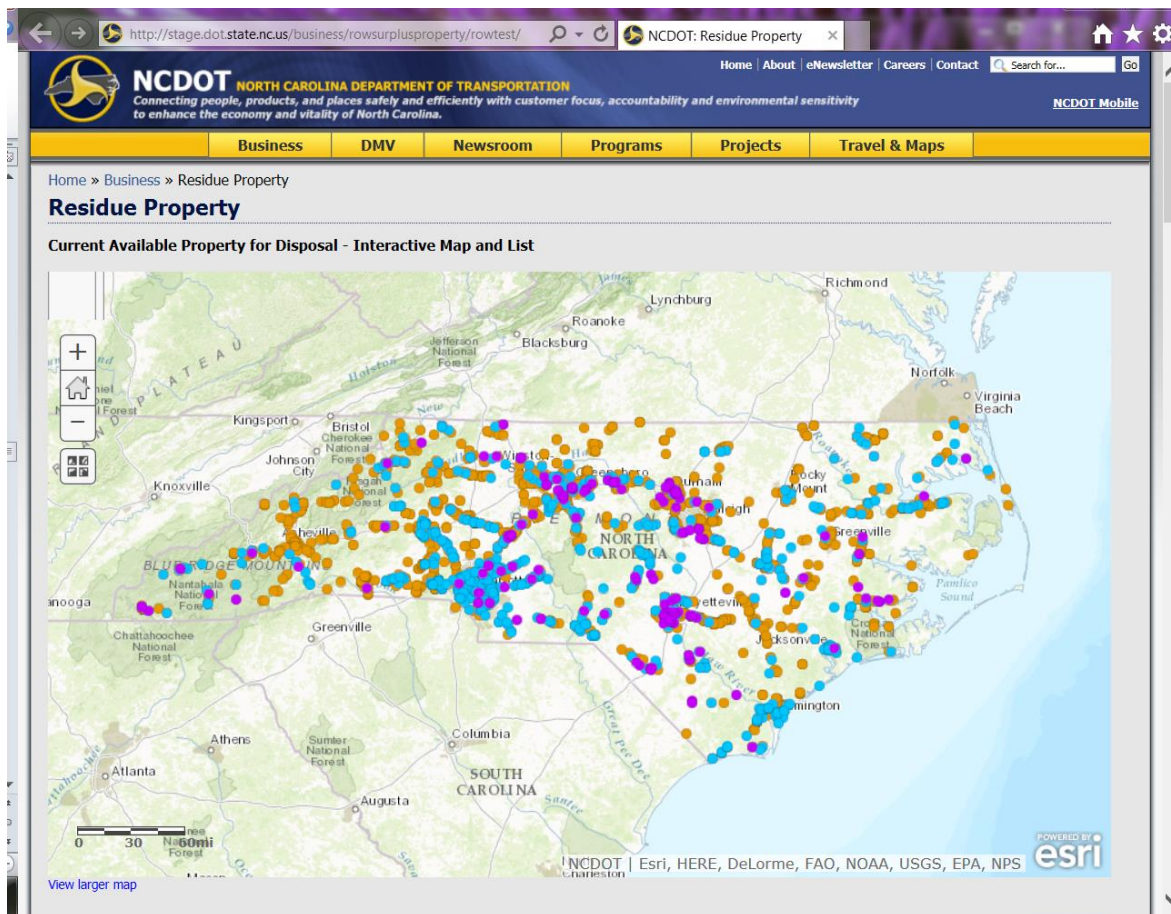

Figure 1: Screen capture of web link showing statewide GIS map with remnant properties available for disposal

As shown in Figure 2, each remnant property location will, in turn, be a clickable link that shows residue parcel information in the context of surrounding properties.

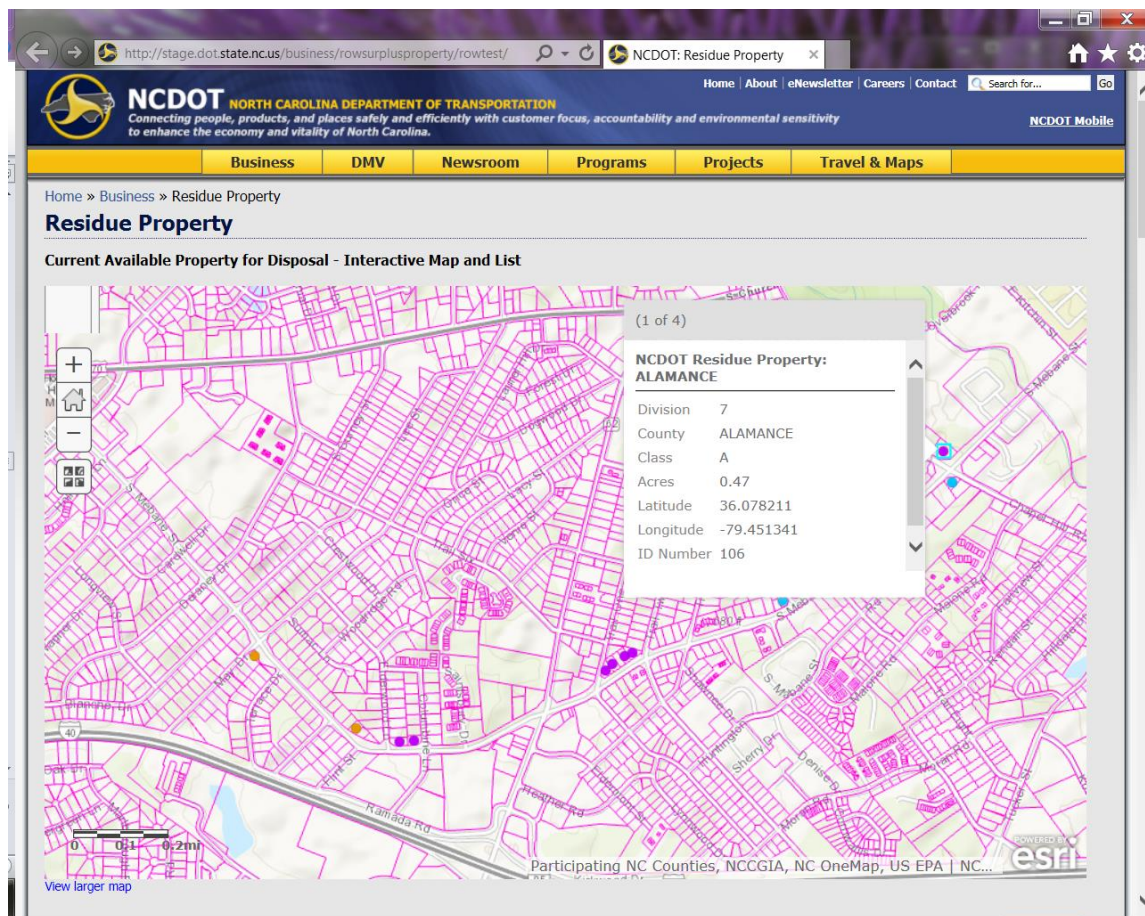

Figure 2: Screen capture of web link showing residue property information at the parcel level

Current Policy

The reduction of DOT's inventory of remnant property will be performed in accordance with current rules relative to the sale of right of way, residues and remainders which is mandated by the North Carolina Administrative Code (NCAC) 2B.0143 as follows:

1. "The sale of all residues will be by public sale, except as hereinafter specified." (19A NCAC 2B.0143[1])
2. "Residue properties sold by public sale are to be sold by either sealed bid, or by auction at the election of the Right of Way Branch. The sale of such properties must be advertised by publication in a newspaper having general circulation in the county in which the property is situated. After opening bids or closing of auction, no upset bids will be considered. The high bid shall be presented to the Board of Transportation at its next regular meeting after the date of the sale for rejection or acceptance. The Department of Transportation may reject all bids if the Department does not consider the

bids to be in accord with the appraised value as determined by the Department.” (19A NCAC 2B.0143[2])

3. “Those residue properties located adjacent to controlled access projects that are landlocked may be sold to the adjoining property owner by negotiation rather than public sale for a consideration not less than the appraised value of the residue.” (19A NCAC 2B.0143[3])
4. “Residue properties may be sold to state agencies and institutions and other governmental units by negotiation rather than public sale for a consideration not less than the appraised value of the residue.” (19A NCAC 2B.0143[4])
5. “Surplus property acquired in connection with highway purposes may be used for the purpose of exchange with a public utility company in part or in full consideration for the property to be acquired for highway purposes from the public utility company. Such exchanges shall be based on the appraised values of the surplus property and the property to be acquired for highway purposes. Residue property acquired in connection with right of way for a project may be used for the purpose of exchange in part or full consideration for right of way being acquired from another property owner on the project. Such exchanges are to be based on the appraised values of the residue property and the right of way to be acquired.” (19A NCAC 2B.0143[5])
6. “Residues which have an area of one-half acre or less or a value of one thousand dollars (\$1,000) or less and the highest and best use is for assemblage with adjacent property may be sold without advertising by negotiations to an adjoining owner. The Property Management Unit together with an Area Appraiser will determine the value of the residue based on its after value in the original appraisal, sales of similar properties and sales of other residues, if any, in the area. After a value has been established, the State Property Manager may negotiate with the adjoining owners concerning the disposal of each residue. The decision of the State Property Manager to accept and complete a sale is final.” (19A NCAC 2B.0143[6])
7. “The Manager of the Right of Way shall dispose of residues with appraised values of less than one hundred dollars (\$100) by executing and delivering on behalf of the Department of Transportation, a quit claim deed to the buyers of such residues, after the transactions are first approved by the Board of Transportation. Conveyances of residues with appraised values of less than one hundred dollars (\$100) shall not require the approval of the Governor and Council of State.” (19A NCAC 2B.0143 [7])
8. “Residue properties or portions of residue properties acquired in connection with right of way for a project and located outside the right of way for that project may be sold by negotiation rather than by public sale to property owners and tenants who are displaced by the project for relocation of the displacee. Such sales are to be based upon the appraised value of the residue properties.” (19A NCAC 2B.0143[8])

Current Procedures

The reduction of DOT's inventory of remnant property will be performed in accordance with the following procedures:

1. Following the completion of a highway construction project, residue properties shall be made available for disposal.
2. Residues shall be cataloged and classified as previously described.
3. All Class A residues shall be given first priority for disposal. At a minimum, in accordance with NCAC, a local newspaper having circulation in the county in which the property is located shall be used for advertisement, with bids to be opened no earlier than ten days from the publication of the advertisement. Class B residues which have an area greater than one-half acre or a value greater than one thousand dollars (\$1000) shall be given second priority for disposition. The remaining Class B and Class C residues will only be disposed of upon request by a potential purchaser.
4. Sales shall be by sealed bid except in special situations when they may be negotiated directly with the purchaser as allowed by NCAC. Prior to advertising for public sale a survey of property limits and appraisal shall be obtained to determine fair market value.
5. Acceptable high bids shall be approved by the Board of Transportation.
6. The high bidder must submit a 10% earnest money deposit in the form of a certified check. The high bidder is then afforded a due diligence period. If the high bidder determines the residue is not usable for intended purposes during the due diligence period and elects not to purchase the residue the earnest money deposit shall be returned only when that supported reason is submitted in letter form. The earnest money deposit will be forfeited in all other cases.
7. After approval of the sale by the Board of Transportation, the request will be presented to the Council of State for final approval.
8. After approval by the Council of State, a quit claim deed is prepared and sent to the appropriate Division office. A Division right of way agent shall exchange the deed for the amount due from the purchaser.

Obstacles to Disposal

Current policies and procedures provide for the disposal of remnant property. However, there are practical matters and some cumbersome NCAC language that may inhibit disposition of residue property at a minimum cost and maximum value to the State.

For example, the potential market for Class B and C residues is limited to one or two adjoining property owners. Unless the DOT right of way agent is contacted by one of these neighbors to

request disposal of the residue it would not be cost effective to proactively survey and appraise these residues. In addition, adjacent landowners may not be interested in obtaining remnant properties categorized as Class B or Class C simply because they are unwilling to incur the tax burden of ownership. In these situations the Department will likely not be able to dispose of the residue.

With respect to the NCAC, the following obstacles and recommended improvements are offered:

1. Currently, 19A NCAC 02B.0143 (a)(2) states that “no upset bids will be considered” for the sale of residue properties. General Statute 1-339.25 (Public Sale; upset bid on real property; compliance bond.) allows Clerks of Superior Court and Municipalities the right to utilize the services of upset bids. Allowing upset bids, especially for Class A properties, would benefit the Department by increasing the potential income realized from the disposition of remnant property.

Suggested resolution- Pursue amending the NCAC to delete the prohibition on upset bids.

2. Currently, 19A NCAC 02B.0143(a)(2) provides that the public sale of all residues “must be advertised by publication in a newspaper having general circulation in the county in which the property is situated.” This language is restrictive, may yield undue expense and does not take advantage of available alternate means to notify prospective buyers.

Suggested resolution- Pursue amending the NCAC to allow DOT the flexibility to advertise by one or more of a variety of methods including but not limited to placing “For Sale” signs on the property, posting on DOA/DOT web sites, contacting adjacent property owners or advertising in a newspaper.

3. Currently, NCAC 02B.0143(a)(3) states that “residue properties located adjacent to controlled access projects that are landlocked may be sold to the adjoining property owner by negotiation for a consideration not less than the appraised value of the residue”. This language requiring consideration for not less than the appraised value is overly restrictive.

Suggested resolution- Pursue amending the NCAC to afford the DOT flexibility to accept any reasonable bid that is in the best interest of the State.

4. Currently, 19A NCAC 02B.0143 (a)(6) states "Residues which have an area of one-half acre or less and a value of one thousand dollars (\$1,000) or less and the highest and best use is for assemblage with adjacent property may be sold without advertising by negotiations to an adjoining owner. The Property Management Unit together with an area appraiser will determine the value of the residue based on its after value in the original appraisal, sales of similar properties and sales of other residues, if any, in the area. After a value has been established, the State Property Manager may negotiate with the adjoining owners concerning the disposal of each residue. The decision of the State Property Manager to accept and complete a sale is final." The acreage and value limits are overly restrictive when considering the nature of residues categorized as Class B and Class C.

Suggested resolution- Pursue amending the NCAC to “one acre or less and a value of ten thousand dollars (\$10,000) or less”.

RIGHT OF WAY ACQUISITION EXPENDITURES

Historical Expenditures

Table 2 details right of way activity and associated acquisition expenditures on transportation projects for the past five fiscal years. Based on the last five fiscal years the average annual number of parcels acquired is 3,729 at an average annual total cost of \$238,699,511. It is important to note that there are significant fluctuations from year to year and that the transition to the new Strategic Transportation Investments (STI) law in 2015 revised project priorities and shifted project delivery priorities. Specifically, this resulted in noticeably reduced acquisition levels and expenditures in fiscal year 2015 which may continue into fiscal year 2016.

However, as can be seen in Table 2, a significant amount of additional expenditures are associated with claims that result in condemnation. Specifically, over the last five fiscal years consent judgements and jury verdicts resulted in average additional compensation of approximately \$50.9 million per year. This dollar value represents approximately 21% of all yearly acquisition activity. Therefore, controlling costs associated with condemnation claims is an area that can lead to reducing the average annual amount of funds expended for the acquisition of rights-of-way by three percent (3%).

Table 2: Historical Right of Way Activity and Expenditures

	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015
Settled by Deed	\$145,578,998	\$149,290,007	\$111,960,000	\$131,520,236	\$65,501,539
Number of Parcels	2,154	3,564	3,446	3,711	3,153
Acquired by Condemnation	\$91,738,064	\$94,432,134	\$48,168,719	\$62,988,907	\$37,636,142
Acquired by Condemnation - Number of Parcels	444	649	510	475	537
Percent of Parcels Condemned	21%	18%	15%	13%	17%
Consent Judgement	\$30,828,641	\$43,873,646	\$52,115,291	\$60,284,023	\$30,159,937
Jury Verdict	\$6,151,012	\$5,673,352	\$14,754,102	\$6,238,375	\$4,604,430
Total Acquisition Activity	\$274,296,715	\$293,269,139	\$226,998,112	\$261,031,541	\$137,902,048

The terms used in Table 2 are defined as follows:

Settled by Deed – Claims settled and closed by negotiation with property owner without any kind of litigation. The property owner either agreed to the initial offer of just compensation or settled after a reasonable administrative adjustment.

Acquired by Condemnation – Claims that were not settled by deed and were acquired by depositing just compensation with the Clerk of Court of the County in which the parcel is located.

Consent Judgment – Claims that were acquired by condemnation, but were settled prior to going to court. These are final settlements and occurred during the given fiscal year, but may have been condemned in a prior year. By law, a property owner has 12 months to answer a condemnation action by the Department.

Jury Verdict – Claims that proceeded to court for trial and a jury verdict was rendered. This determined the value of the final settlement. Jury verdicts are for the given fiscal year, but are for claims that were condemned in previous years.

Total Acquisition Activity – Any and all claims processed by the Department during a given fiscal year.

Reducing Future Right of Way Expenditures

The DOT acquires property for transportation projects only after it has been authorized to purchase necessary rights of way as shown on project plans. Furthermore, as demonstrated over the last five fiscal years there is significant annual fluctuation in the number of parcels and associated right of way expenditures for project acquisition. However, minimizing the number of claims that go to condemnation and controlling costs associated with condemnation claims is an area that can lead to cost savings. The following methods to reduce the average annual amount of funds expended for the acquisition of rights-of-way by three percent (3%) or more are as follows:

- 1) Decrease the interest compensation for condemnations that result in jury verdict: Currently, GS 136-113 “Interest as a part of just compensation” refers to GS 24-1 for the legal interest rate of eight percent (8%) per year in cases of condemnation which result in a jury verdict. This rate gives condemnation attorneys a significant advantage over attorneys representing the State when negotiating settlements. Per law, a property owner has one year to file and answer to condemnation. This can effectively add 8% to any jury verdict above the amount deposited. Also, many owners of complex or high value properties are requesting to delay settlements until after the project is completed. This can result in a three to four year delay in trial and add up to 24%-32% in additional compensation over the deposit. In addition, due to limited court staffing it can be difficult in some counties to obtain a date for judicial proceedings which can further delay resolution and increase interest costs to the DOT in the event of a jury verdict.
- 2) Enhance the appraisal process for claims on more complex properties: Businesses such as quick stop restaurants (QSRs) and convenience stores (C stores) rely on traffic patterns to operate successfully. For example, QSRs rely on drive through customers and C stores must allow for gasoline tankers appropriate access to offload to underground storage tanks. Any change in these traffic logistics must adequately be accounted for in the appraisal process. Therefore, prior to appraisal engineering traffic studies are being performed to evaluate effects of changes in on-site access and usability. This will provide more factual support for value determinations and offers of just compensation in settling claims.

- 3) Obtain two appraisals when damages or property values are high: For situations where damages amount to more than \$250,000 or the impacted parcel's value is greater than \$1,000,000 second appraisals will be requested to support the ultimate determination of just compensation. The Department has made these assignments occasionally in the past, but from this point forward will be more proactive in doing this. This will provide more support for value determinations and offers of just compensation in settling claims.
- 4) Increasing authority of negotiators: In an effort to reduce condemnations, and allow for more negotiated settlements prior to mediation as of January, 19, 2016, the administrative adjustment authority was increased from 25% to 40% of the approved appraisal. This provides negotiators the flexibility to obtain reasonable settlements while keeping more claims out of condemnation altogether. It should be noted that all administrative adjustments require substantive justification.

In summary, minimizing the number of claims that go to condemnation or controlling costs associated with condemnation claims is an area which can lead to a reduction in the average annual amount of funds expended for the acquisition of rights-of-way by three percent (3%) in future fiscal years.

APPENDIX – Catalog of Remnant Properties

Division	County	Class	Value	Area (Acres)	Latitude	Longitude
