

STATE OF NORTH CAROLINA
DEPARTMENT OF TRANSPORTATION

ROY COOPER
GOVERNOR

JAMES H. TROGDON, III
SECRETARY

May 10, 2019

Greg Gaskins, Deputy Treasurer
State Treasurer of North Carolina
3200 Atlantic Avenue
Raleigh, NC 27604

Dear Greg,

In response to your request on May 3, 2019, the North Carolina Department of Transportation respectfully submits responses to your request for information related to the issuance of Build NC Bonds. Attachment A provides your original information request with our responses in italics.

Please let us know if you need any additional information. We appreciate your help in implementing the Build NC Bonds program.

Best regards,

A handwritten signature in black ink, appearing to read "Evan Rodewald".

Evan Rodewald

ATTACHMENT A

Information Request Document

1. Please provide the exact date of the last ["transfer", "loan" or "due to/due from", hereafter called "advances"] from the Highway Trust Fund to the Highway Fund. *April 17th*. Please provide a written explanation as to how the advance, and previous advances, were done.

The General Ledger Unit prepares a daily cash analysis to monitor cash balances in the Highway, Trust and Turnpike Funds. If the cash balance in the Highway Fund is low or in the negative, the General Ledger Unit will contact the Director or Deputy Director of Accounting Operations to determine if we need to borrow funds from the Trust Fund. The confirmation can be verbal or through e-mail. (The current loan balance is provided daily on the Cash Analysis that is provided to management. At any time, the balance and daily activities can be accessed using SAP transaction FS10N and the account 11430003.)

The following document is entered in SAP to record the loan:

- Please provide the specific legislative reference under which the advances were authorized.
N.C. General Statute 143C-6-11 and N.C. General Statute 147-86.15.

3. Please provide any documentation regarding SL 2001-424 between the Treasurer's office and DOT either at the time of the legislation or subsequently regarding the actions to be taken in accordance with your answer to #2. *We have no documentation from that period.*
4. If \$1.1 billion is not the current amount of the advances, please update. *The exact amount as of May 10, 2019 is \$1,140,300,000.*
5. Please provide the estimated repayment schedule of the advances and the source(s) of the funds that will be used for the repayments.

NCDOT intends to repay the advances from the Highway Trust Fund to the Highway Fund within the next five fiscal years. The sources NCDOT will use for repayment are:

- *Federal reimbursement of past State expenditures on projects eligible for future aid. In situations where NCDOT spends more on projects eligible for federal aid than can be reimbursed under the current federal fiscal year obligation limitation for the State, the federal Advance Construction process allows such over expenditures to accumulate until additional obligation authority is made available to the State in the future. In the same way spending on the acceleration of federal construction projects (beyond the State's obligation authority) depletes Highway Fund cash, the decelerated spending on federal construction projects replenishes Highway Fund cash.*
- *Federal redistribution of aid unexpended from other states (August Redistribution). In FFY 2015-2016 NC received \$35,063,795. In FFY 2016-2017 NC received \$113,085,468. In FFY 2017-2018, NC received \$166,096,797.*
- *Reduction in operations and maintenance expenditures.*
- *Reimbursements from FEMA and FHWA for disaster relief expenditures.*
- *Reimbursements from GARVEE bond proceeds for eligible expenditures already incurred by the Highway Fund.*

Although we are making no assumptions about future state revenue increases, potential new revenue sources in the future would also help repay the Highway Trust Fund advance.

6. Please provide the specific projects and amounts that the advances were expended upon. Note which are federal advance projects, state projects or other uses. Were any of the advances used for working capital purposes?

The \$1.1 billion in advances from the Highway Trust Fund to the Highway Fund were part of a major Departmental effort to accelerate projects and reduce excess cash balances as required by Section 34.23(a) to (d) of Session Law 2014-100. This effort to accelerate transportation programs took place over several years, but most of the financial impact of the acceleration took place starting in FY 2017-18. For this reason, our analysis focuses on the specific time period from July 2017 through March, 2019. Chart 1 shows cash balances at the end of FY 2016-17 were roughly \$2.1 billion. Between July 2017 through March 2019, roughly \$1.8 billion of these balances were deployed to:

- *Accelerate STIP construction, both State and federal.*
- *Accelerate highway operations and maintenance projects including contract resurfacing, bridge replacement, pavement preservation, bridge preservation, roadside environmental programs and general maintenance.*

- Fund disaster relief efforts associated with Hurricanes Florence, Michael, and Matthew as well as snow and ice removal.

Chart 1

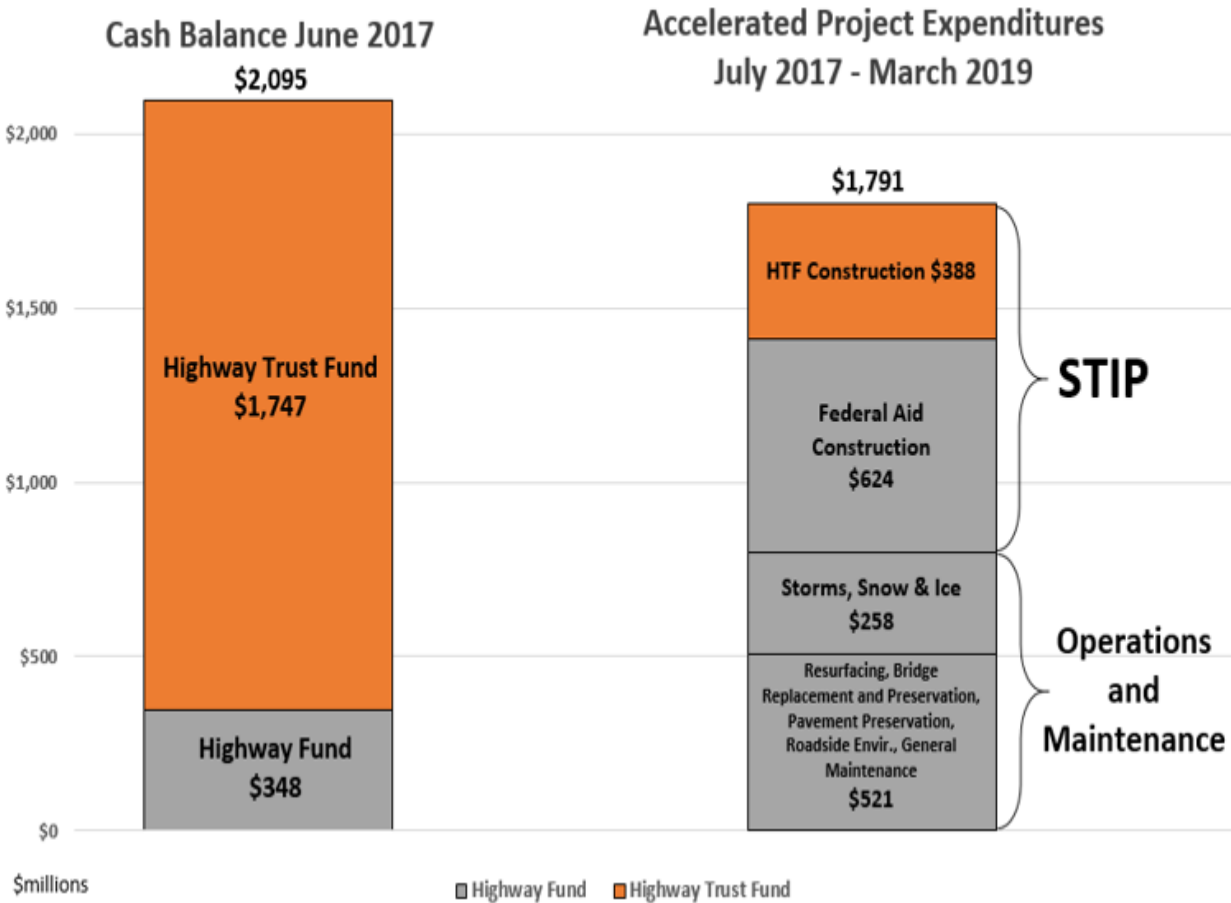

Chart 1 above also illustrates an imbalance between the distribution of the cash balances, the large majority of which were in the Highway Trust Fund; and the program areas with accelerated spending, the large majority of which are in the Highway Fund. This imbalance is related to the structure of the two governmental funds, and the programs supported by each, which is summarized in Chart 2 below.

program overall. However, we can identify several STIP projects that were started ahead of schedule during this time period. For example:

- I-4739: I-40 Widening Between Raleigh and NC 42: **286 days accelerated**
- U-2412A: Greensboro/High Point - SR 1486-SR 4121 (Greensboro/High Point Road) from proposed US 311 Bypass to West of SR 1480 (Vickery Chapel Road): **286 days accelerated**
- B-4974: Replace Bridge 51 Over Pee Dee River on NC 24-73-27: **101 days accelerated**
- I-5852A: I-73/US 421, from I-85 to I-40 in Greensboro - Pavement Rehabilitation: **381 days accelerated**
- I-5825: I-77/US 21 from SR 1577 (Tyvola Road) to I-277 In Charlotte-Pavement Rehabilitation: **109 days accelerated**
- W-5602: NC 172 Camp Lejune Gate to NC 210 - Convert two lane roadway to three lane roadway with a two-way left turn lane: **500 days accelerated**

STIP Construction – Acceleration of Federal Aid Projects

Chart 2 illustrates that the STIP is funded both by federal aid in the Highway Fund and State revenues in the Highway Trust Fund. Although NCDOT could have restricted its acceleration of STIP construction to projects funded solely by State Highway Trust Fund revenues, such a decision would not have been practical. Federal aid projects comprise over half of the STIP, are as beneficial to the State as non-federal projects, and are as worthy of acceleration.

Accelerating federal aid projects involves using State funds to advance the federal aid portion of the project. NCDOT then bills FHWA in the future as more federal obligation authority is made available to the State. Because federal aid is in the Highway Fund, the State funds used to advance federal aid construction technically come from the Highway Fund. However, cash balances in the Highway Fund were much lower than those in the HTF, as shown in Exhibit 1, so accelerating federal aid projects required NCDOT to either 1) advance funds from the Highway Trust Fund or 2) fund those projects directly out of the Highway Trust Fund by reclassifying them as State rather than federal projects. This second option, although feasible, would remove any future potential obligation FHWA might have to fund these projects, and over the long term, might reduce the opportunities for NCDOT to maximize federal aid from discretionary sources or redistributions of unused aid from other states. However, advances between the Highway Trust Fund and the Highway Fund are permitted under G.S. 143C-6-11 and G.S.147-86.15 to facilitate the cash flowing and acceleration of transportation projects. Attachment B itemizes State expenditures on federal aid projects that have not yet been reimbursed, and were therefore paid out of the Highway Fund pending reimbursement.

Storms, Disasters and Emergency Activities

Roughly \$258 million in cash was used over this period to fund several activities related to disaster relief for Hurricanes Florence, Michael and Matthew, as well as address problems related to snow and ice. These activities included:

- Event preparation to include staging equipment and barricades in areas prone to flooding and prepositioning of materials in areas forecasted to have the biggest impact. For snow and ice events, readying equipment such as outfitting trucks with snowplows and spreaders, mixing and placing anti-icing materials (salt brine).
- Installing signs and detours routes in damaged areas.
- Replacing washed out or damaged drainage pipe.
- Repairing or replacing damaged bridges.
- Repairing shoulder wash outs and bridge approach wash outs due to high water.

- *Repairing roadway slopes and damaged pavement due to mud or rockslides in Western NC.*
- *Repairing pavement damaged by high water.*
- *Clearing debris from the roadway due to high winds, sleet or freezing rain.*
- *Removing debris from the right of way as a second step after the roadway is cleared and passable.*
- *Removing debris from waterways that has accumulated next to bridge structures or culverts, preventing potential damage*
- *Plowing snow, and placing salt following a snow or ice event.*

One reason NCDOT was not provided additional State aid for Florence was that some policy makers believed NCDOT could address disaster relief needs from its cash balances. We want to emphasize that transportation costs related to disaster relief, which may pay out in 18 months or less, have a more immediate effect on cash balances than do STIP projects, which may pay out over three, four, or more years.

Acceleration of Operations and Maintenance Projects

Between July 2017 and March 2019, \$521 million in cash was used to accelerate projects related to maintaining the State highway network. These accelerated activities included:

- *Bridge replacements and rehabilitation activities include deck overlays, joint replacement, girder and foundation repairs, and painting of steel girders.*
- *Bridge maintenance and preservation activities include deck pothole/spall repairs, sweeping debris from decks, cleaning drains, washing girders to remove brine from snow and ice activities, and clearing vegetation adjacent to bridges. Bridge preservation activities extend the lifespan of bridge structures by keeping bridges in good condition and deferring costly replacements*
- *Contract resurfacing program activities include resurfacing and rehabilitation of pavements. Resurfacing activities include placement of plant mix asphalt in one layer not to exceed 2 inches in depth, where rehabilitation activities include placement of multiple plant mix asphalt layers, exceeding 2 inches in depth. A large portion of our 82,000-mile roadway system has asphalt pavement, and to keep these roads in good condition we typically resurface or rehab primary routes every 12 years. Secondary route resurfacing or rehab is typically less frequent, depending on traffic volumes and resulting deterioration rates. Resurfacing funds are also used for patching or milling severely distressed areas ahead of resurfacing or rehab, replacement of pavement markings and markers, and minor grading to reestablish proper shoulder sections on resurfaced or rehabbed routes.*
- *Pavement preservation activities include application of asphalt surface treatments (AST) on rural secondary routes, thin lift plant mix asphalt overlays on subdivision routes, crack sealing asphalt pavement to extend the time between resurfacing applications. On higher volume routes with concrete pavement, preservation activities include repairs and grinding to improve surfaces, and joint cleaning and sealing of concrete pavement. Funds are also used to reestablish pavement markings and markers that are no longer functioning.*
- *Roadside environmental activities include routine mowing, string trimming, litter removal, clearing brush and tree debris, herbicide treatments, and other vegetation management activities. In addition, roadside environmental activities include maintenance of landscape beds, maintenance of rest area facilities and grounds, and maintenance of stormwater retention ponds.*
- *General maintenance activities include items such as pot hole repairs, pavement patching, correcting low or high shoulders, addressing drainage related issues, replacing pipe, removal of*

debris from the roadway including dead animals, repair of guardrail, sign replacement, pavement marking installation, maintenance and timing adjustments for traffic signals, Incident Management Assistance Patrol (IMAP), and management of multiple District Office functions including review and approval of driveway permit applications, encroachment agreements, and new subdivision plans.

Attachments C and D represent all projects identified for contract resurfacing or pavement preservation program funding for the two fiscal years being analyzed. Note that all projects are not complete at this time, but the majority are under construction/under contract. Attachment E represents all bridge program and bridge preservation projects let since July 2017.

7. Please provide a copy of the policy/procedures that govern the advances. *Same as response to question #1.*
8. Please provide information on ANY OTHER calls or anticipated transfers out of the Highway Trust Fund and to whom. *We are unaware of any significant calls or transfers out of the Highway Trust Fund apart from what has been disclosed.*
9. Please provide a written certification from DOT that there is no other information germane to the issuance of the Build NC Bonds. *We certify, to the best of our knowledge, there is no other information germane to the issuance of the Build NC Bonds.*
10. Please provide a written description as to the actions that DOT will take in the event that the Build NC Bonds are not issued this fiscal year. *Build NC is providing \$345 million in funding to support 38 projects with a total cost of \$609 million. Build NC funding represents 57% of these projects. Without the funding provided from the Build NC bond proceeds, these projects will not be awarded.*
